## Responsible Care policy and principles

ITX CARGO SRL ensures that its commitment in the areas of safety, health and the environment is clearly understood as an integral part of the company's general policy and that management and employees are aware of the commitment and are involved in the pursuit of the target and achieved results awareness.

### ITX CARGO, in carrying out activities:

- Complies with actual regulations and promotes the adoption of criteria, rules, procedures, and behaviors aimed at improving performance, cooperating with institutions, national and international organizations with the scope to contribute at a sustainable development.
- Evaluates the current and potential impact of its activities on safety, health, and the environment.
- Collaborates with the competent organization to define and implement procedures and behaviors to improve its performance.
- Ensures, through appropriate awareness-raising, information and training actions, the involvement of human resources in the Responsible Care Program application.
- Considers an important factor for the supplier's selection, the adoption of a commitment to safety, health, and the environment.
- Promotes, in the research and development field, activities in the areas of safety, health and the environment, in order to develop safer processes with a lower environmental impact.
- It also undertakes to:
  - optimizes the resources' s use.
  - minimizes the production of waste and ensure its correct disposal.
  - improves the impact of its emissions in the internal and external environment.

**ITX CARGO will prefer suppliers who apply policies and procedures regarding the following Responsible Care program**  
(list of examples and not exhaustive)

- **SAFETY AND HEALTH IN THE WORKPLACE:** risk assessment - individual and collective protection systems and devices - reduce accidents, injuries, and occupational diseases as a main object - medical / health protocol for checking and protecting the health of workers - health of workplaces.
- **DRIVING SAFETY AND HEALTH:** staff training - application of safe and regular driving principles - respect for driving times, breaks and rests - procedure for managing emergencies during transports.
- **RESOURCE MANAGEMENT:** reduction in the use of raw materials and fossil fuels - energy efficiency - use of alternative energy sources for the company's energy needs.
- **ENERGY SAVING:** designed a dedicate Environmental and Energy manager – electricity, gas, water consumption control - energy diagnosis and consequent actions - definition of energy saving objectives.
- **VEHICLE FLEET:** Euro 6 standard - use of electric or hybrid vehicles - use of non-fossil fuels (eg. LNG or methane) - use of low rolling resistance tires - truck long - 18 meter.
- **ROUTES:** privilege of motorway and high-speed roads - reduction of local road - use of intermodal mode (road / rail)
- **EMISSIONS:** designed an Environmental manager - overview of CO2 and gas emissions - measures aimed at reducing CO2 emissions for commercial relationships (e.g. teleconference, videoconference, limitation of travels).
- **WASTE:** designed an Environmental manager - maintenance programs - controlled management of spare materials and waste - recycling programs for wood, plastic, paper, and cardboard - controlled disposal of toner and ink cartridges.
